

Helen J. Kessler, FAIA, LEED Fellow, WELL AP is President of HJKessler Associates and a Principal at UpFront Regenerative Design. She is passionate about connecting the dots in complex systems such that stakeholders can discover solutions that work for all. She uses an integrative design approach to enhance synergies among systems and has had a leading role on over 80 LEED projects including education, hotels, office, commercial interiors, healthcare, and many other project types.

Notable projects include several that were LEED Platinum certified: Northwestern University's Kellogg Global Hub and Kresge Centennial Hall, Sarah E. Goode STEM Academy and Legacy Charter School in Chicago, and the Jewish Reconstructionist Congregation of Evanston. She is currently sustainability consultant for the Discovery Partners Institute and for the Advocate Aurora Healthcare Illinois Masonic Center hospital additions to the Center for Advanced Care.

Helen is a frequent speaker and author on sustainability topics and teaches various courses, including "Systems Thinking for Sustainable Design" at Northwestern University.

She has been a CREW member for over 30 years, had been a CREW Chicago Board member and Secretary, and has participated on many committees, including Leadership & Professional Development, Communications, Equity and Inclusion, and various convention committees. She is currently a member of the Programs committee.

Helen has received numerous awards, including the USGBC Illinois Chapter Natural Leaders "Intent to Matter" award and its Chapter Leader award, AIA Illinois' R. Buckminster Fuller Award for Social Good, the inaugural Illinois Real Estate Journal Women in Real Estate "Impact award" and Alumnus of the Year, The University of Arizona Honors College. She is a member of the inaugural class of LEED Fellows and was recognized as a 2021 Notable Woman in Design and Construction and a 2022 Notable Leader in Sustainability by Crain's Chicago Business.
